

**SILENT PROTECT  
RESIDENTIAL**

**Powerful Security Technology  
for Association Residents.**

# **Powerful Technology that Helps Secure the Safety & Property of Association Residents**

**Silent Protect Residential is a powerful security technology built on the same platform as Shield Group's Silent Protect law enforcement technology and was designed and built-in coordination with major law enforcement agencies.**

**It gives Association residents world-class security technology that enables them to alert Association security 24/7 and provide security with the information they need to come to their aid quickly and effectively – protecting both resident's safety and property.**

**SILENT PROTECT**  
RESIDENTIAL

**COMMUNITY  
CONNECT** SYSTEMS

# Instant, GEO-Tagged, Silent Alert, Communication and Information to Association Security.

Silent Protect provides a direct, silent, two-way communications link between residents and their Association security provider--- providing security personnel with a wealth of vital information about the resident's threat or concern.

The silent alert feature enables the resident to silently alert security when calling and speaking could accelerate an already threatening situation.

# Touch One Button and Association Security Knows Exactly Where Help is Needed

When the Silent Protect Residential security panic button is pressed, the precise GPS location of the resident is transmitted to Association security.

Indoors or outside, 24 hours-a-day anywhere in the community, residents under threat or needing help are instantly linked with security.

The GPS location of the resident stops transmitting after the threat is over and does not ever activate unless the panic button is pushed.

**SILENT PROTECT**  
RESIDENTIAL

**COMMUNITY  
CONNECT** SYSTEMS

# Association Security Can Silently Listen to What is Happening When They Cannot Safely Talk

When the panic button is pushed, activation of the mobile device's microphone is triggered. This allows Association security to hear what is happening while they are in route to the resident.

The smartphone's speaker, however, is not activated as Association security listens. By doing this Association security can better prepare while in route to the resident. Any 3<sup>rd</sup> party who is posing a threat remains unaware that help is on the way and that a communication line is open to Association security.

# Residents Have the Option to Send Live Video or Record Video of Threats

Live stream or recorded video by a resident to Association security can easily be enabled with the touch of a button. It is silently delivered to Association security without the knowledge of those posing the threat.

# Silent 2-Way Chat with Association Security

**When a resident cannot safely speak to Association security, they have the option to initiate silent 2-way chat. This feature operates silently using vibration for incoming texts from Association security to avoid compromising the user's silent communication with Association security.**

**SILENT PROTECT**

**COMMUNITY  
CONNECT** SYSTEMS

# Capability to Broadcast Security Messages to All Residents

In the event of an Association-wide threat to the community, Silent Protect Residential provides Association security and property management with the ability to instantly and silently broadcast alert messages, information and instructions to *all* residents, employees and others in the community.

# Optional Response Monitoring Services Available

**Silent Protect Residential offers both back-up and front-line monitoring of all incoming resident messages received. This feature is optional and as needed.**

**If Silent Protect monitoring services are utilized, it can be used either 24/7/365 or easily customized to your locations' specific requirements.**

## Registration is Quick and Easy

Secure registration to use the Association's Silent Protect Residential technology is quick and easy with self-filling fields and the ability to easily make corrections.

## Sign In One-Time After Registration

After registration, the user signs-in and they're all set to begin using world-class residential technology protection.

## Panic Button Transmits User's GPS Location

Tap the Silent Protect Residential security panic button from anywhere in the community and your GPS location is sent to Association security.

GPS locations are never activated unless the panic button is pressed.

## When It's Isn't Safe to Talk.

Because speaking out loud about a threat isn't always safe, pushing the panic button activates the smart phone microphone. This allows Association security to hear what is happening while they are in route to the resident.

The speaker is not activated so the person who is posing the threat never knows that security is either on the way or can hear what is happening.

## Livestream in real Time or send video recordings.

The user can either livestream or send recorded video to Association security with the touch of a button. It is silently delivered to Association security without the knowledge of those posing the threat.

## **Broadcast Messages to Every Resident at the Same Time.**

**When every resident of the community needs to know about a threat, everyone can be instantly sent information & instructions to their smart phones.**

**The message can include photos, videos or plain text.**

# Incoming Alert Calls

All incoming alerts trigger a continuous audible alert at security HQ.

## Details of incoming Resident Alert

Security can chat with the person in distress, silently listen to unfolding events, hear the other side and see the precise GPS location of the resident's location.
